What a week in Australian football! For those of us who were also around in 2003 when the last 'evolutionary change' occurred, this week's decisions of the members of the FFA were every bit as momentous.

We have previously been in touch with you and communicated our views on the AAFC's role going forward. As you're aware, the Congress Review Working Group recommended that AAFC be given 'special status' that will fast track our representation on the FFA Congress.

In the meantime, we continue with our other

priorities. (In case you missed our emails in August, you can [catch-up on our six priorities and progress against them right here](#)).
